

WINDOWS AZURE ASSESSMENT

Cloud Computing Assessment enables businesses to analyze the viability of cloud computing and assess the economic impact of the Windows Azure platform. This engagement will enable creation of a practical roadmap for Azure adoption including migration, co-existence and integration strategy for existing assets.

ASSESSMENT GOALS

- Articulate the benefits of the cloud model and compare against other platforms
- Analyze the business impact of Windows Azure
- Develop customized roadmap for Azure adoption

ASSESSMENT HIGHLIGHTS

- Business and Technical sessions to drive Cloud and Azure awareness
- Create Cloud Feasibility Plan using the "Cloud Fit Analysis" framework
- Analyze the economic benefits of moving applications to the cloud using Windows Azure
- Develop a comprehensive roadmap to transition applications to Azure
